

DUCKIES Canary Network

Executive Summary

Duckies is Yellow's Canary Network that tests the innovations of Yellow Network in a real-world environment, but with smaller transaction value.

SDUCKIES are the utility token of Canary Network and can be obtained by completing quests, inviting friends to grow their community, and play an exciting card NFT game to get a super-powered Duckling that unlocks exclusive benefits for holders, including yielding SYELLOW tokens.

Explore Duckies community calls, Ambassador Program, and start minting and melding Ducklings.

Duckies Canary Network

Duckies is built with the same team, code, and tools as Yellow Network, integrates all of the functionality of Yellow Network, and acts as a Yellow's sandbox to experiment with innovations and new functions.

Minting Ducklings

Use your SDUCKIES to get a totally unique (& completely random!) deck of Ducklings, unique NFTs. Every Duckling has its own set of unique traits (eyes, wings, beaks, hairstyles, clothes) that defines how rare it is and what qualities it has.

Rarity

There are four basic levels of Ducklings rarity:

Level 1	Level 2	Level 3	Level 4
Common	Rare	Epic	Legendary

There are two additional types that can be acquired ONLY through melding:

- Super-Legendary (unlocks SYELLOW's yield)
- Zombeaks (your Duckling can mutate into a Zombie Duck)

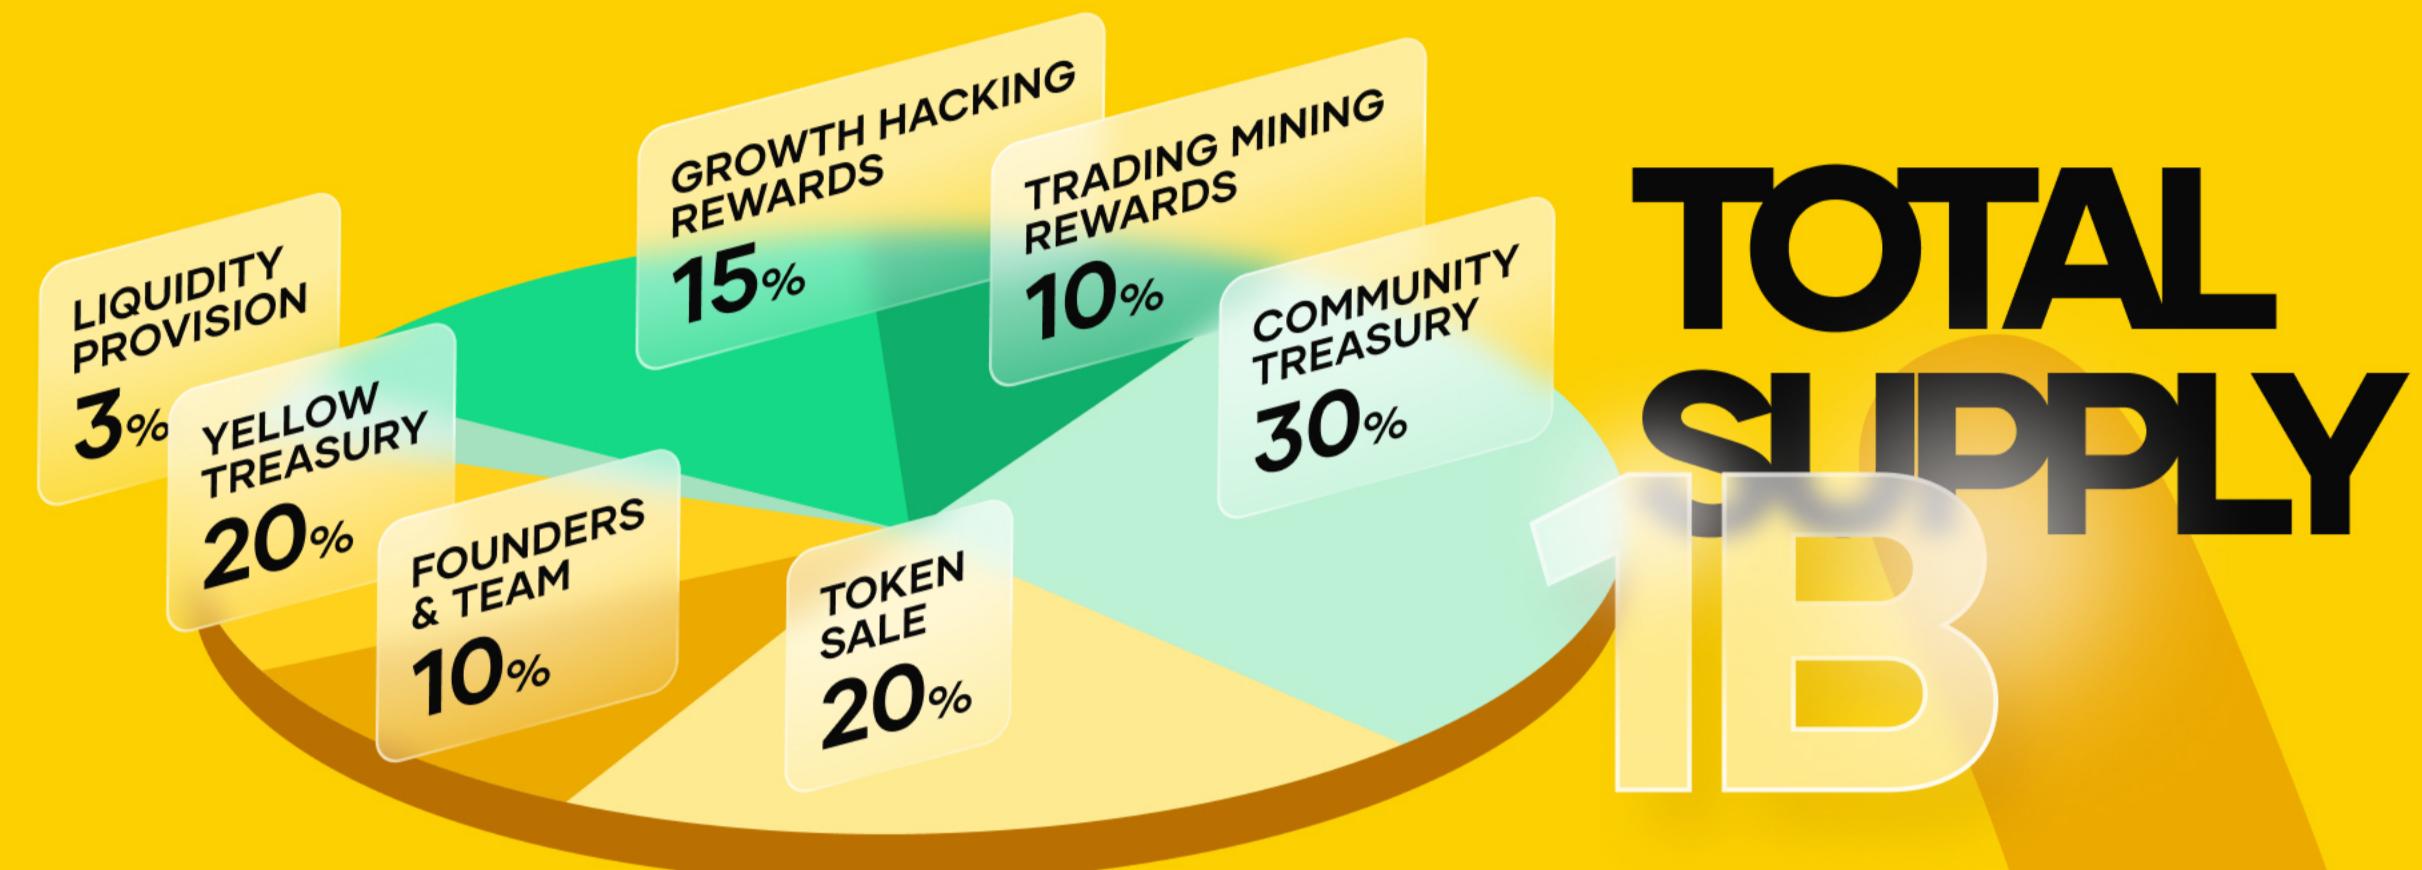

Booster Packs

Every minting action will get you a chosen number of randomly assorted cards (from 1 to 100.) You can also get booster packs as a reward for winning social calls or performing quests.

Duckonomics

Networks: Polygon*

*Deployment on more chains is expected in the future

Tokens that are used for minting/melding card decks are returned to the project pool and are used for payouts and rewards. Cliff and vesting are applied.

Quests for DUCKIES

Quests are the bread and butter for getting more SDUCKIES to be used to mint your very own Ducklings NFT collection. If you have a team of invitees, you can also claim bonuses for all quests they complete.

Melding Ducklings

Get your tin foil hats on and start the crazy science of mixing the Ducklings' DNA to produce a new Duckling of a higher rarity. Select 5 Ducklings of the same element (Water, Fire, Air, Metal, or Earth) to initiate the meld.

The higher the rarity class, the more valuable your Duckling is and the more benefits it will bring to you.

But be careful! If something goes wrong, you might get a zombie-mutant.
